LEFELD

Industrial & Welding Supplies

HISTORY

For more than 60 years, LEFELD Industrial and Welding Supplies has been serving western Ohio industrial, commercial, and residential customers with welding, fabrication, service, and supplies. From our humble beginnings of fixing agricultural equipment and repairing tires - one thing remains the same - we still approach every customer with the same respect, honesty, and enthusiasm instilled in the beginning.

Today, LEFELD Industrial and Welding Supplies has two locations to best serve our loyal customers - Coldwater and Greenville. These locations provide an experienced staff and knowledgeable sales force, incredible supplies inventory, as well as rental tools and equipment.

Meeting the demands of the customers often requires “customizing” applications to meet the needs which exist. LEFELD can help make those changes quickly and effectively for the customer using the Fabrication Shop and highly trained Service Department. Whether it be service in the field, or at our location - LEFELD is able to handle the most demanding projects. We do it right the first time, and back our work with the guarantee our customers have appreciated since our inception.

There is no need to go any further for all your industrial, custom fabrication and welding supply needs. LEFELD has the tools, talent, accessories, and gases required to do the job. LEFELD Industrial & Welding Supplies is truly a one-stop solution center for the contractor and welder.
